Writing and researching reports using the computer has changed dramatically in the last few years. Access to interactive CD-ROM's, the Internet, and other pieces of software for collection and storage of data has made the process more complex for both teachers and students.

This book offers the teacher tips, tricks, and proven methods to help teach research skills. It also provides lessons for students in grades 4-8 to use when formulating the research question, conducting the research and evaluating the results. A CD-ROM is included with PDF versions of all the handouts, sample databases, and additional information.

The 96-page book includes chapters entitled:

- Introduction to Research
- Choosing a Topic
- Documenting Information
- Collecting Information
- Searching for Information
- Evaluating the Information
- Using the People on the Internet
- Research Investigation Lesson and Skills

This 32-page booklet provides educators with the tools needed to learn how to effectively evaluate a Web site. Once you feel comfortable with this evaluation process, it will become second nature to teach these same methods to students to educate them about information validity on the Internet.

Evaluating Internet Web Sites includes:

- Tips for preparing to think critically about the Web
- An in-depth Web Site Rating Form
- Reproducible Evaluation Surveys for students at all levels
- Lesson plan (with transparency originals) for teaching students how to evaluate Web sites
- Glossary of terms
- References suggested for additional reading
