5. SCIENTIFIC CONCEPTS

Each student must select one (1) of the following scientific concepts (each a “Scientific Concept” and collectively (Scientific Concepts”):

(i) Design and implement an engaging method to demonstrate and explain the Doppler Effect. What is it? What information can be obtained from observing it in nature?

(ii). Demonstrate the nature of a parabola, paraboloid, or parabolic mirror. What is the importance of that shape to the space program, communications, or energy consumption issues?

(iii). Demonstrate and explain graphically, or with props, why the earth's sky appears blue. Use common, every day materials rather than professional scientific equipment.

(iv). Explain or demonstrate the nature of a space craft's orbital path. How was the orbit achieved? What sustains it? Provide a simple analogy; one understandable to a person with little or no knowledge of physics.

(v). Demonstrate a novel approach for explaining how the field around a conductor carrying an electric current, and the field around a magnet, can exert a force on each other. Be creative!

(vi). Explain and demonstrate either the Bernoulli Principle, or the Venturi Effect.....or both! The windier or wetter the better.

6. VIDEO SUBMISSION

To enter, a student must submit one, and only one, entry video explaining and/or demonstrating one of the Scientific Concepts listed above in Section 5 (the “Entry Video”).

The Entry Video must be longer than 60 seconds, but not longer than 120 seconds. The Entry Video must be the original work of the student. Only the student can appear in the Entry Video, no other individuals should be filmed. Scores will be broken down in to 5 areas:

- (i) Creativity (20%);
- (ii) Content's relation to stated criteria (30%);
- (iii) Persuasiveness (10%);
