

Butaan Lizard (*Varanus olivaceus*)

Habitat: The Butaan Lizard is very rare and can only be found in the forests of the Philippine Islands.

Size: It's the largest fruit-eating lizard on the planet and can grow to be 7 feet long and weigh 70 pounds.

Prey: Have you ever heard of a frugivore? They eat a diet consisting almost entirely of fruit!

Did You Know? This shy animal spends most of its time high in trees, coming down only to eat ripe fruit that has dropped to the ground.
