

Polar Bear (Ursus Maritimus)

Habitat: With fur all over their bodies, even the bottom of their paws, Polar Bears live where it's really cold! They can be found in Alaska, Canada, Russia, Greenland, and throughout the Arctic.

Size: Males are 8 to 11 feet long and average 500 to 1,100 pounds, but can reach up to 1,500 pounds.

Prey: These carnivores eat only meat - mainly seals, but sometimes walruses.

Did You Know? Polar Bears are incredible swimmers and have been spotted more than 100 miles out to sea!
