

## Wolverine (Gulo gulo)

**Habitat:** Wolverines are found in the tundra, forests and mountains. They like wilderness areas, far away from people.

**Size:** Though even the largest males weigh less than 50 pounds, wolverines are so strong they can overpower animals five times their size!

**Prey:** Wolverines will eat just about anything, from berries to eggs to full-sized deer.

**Did You Know?** Because the wolverine gives off a strong, unpleasant odor, it is sometimes called the “skunk bear.”

MUTUAL of OMAHA'S  
**WILD KINGDOM**  
PREMIERING AUGUST 20  
ON ANIMAL PLANET
